Advertisement Material

General:

Data quantities <10 MB can be emailed to the recipient.

Data quantities >10 MB must be submitted via www.wetransfer.com.

We work in the PC environment using Adobe Creative Cloud.

Fonts:

As a starting point, the used fonts are to be submitted; they can be included in a PDF or vectored before submission.

PDF:

PDF's are to be submitted in print quality 300 dpi.

TechMedia A/S is not liable for errors in the submitted PDF material.

Photos:

Photos are to be submitted in print quality 300 dpi in TIFF format (file name.tif) or J-PEG format (file name.jpg).

Photos submitted in lower than the requested quality can be used, however TechMedia A/S cannot be held responsible for the quality.

Photos from the internet are usually not of print quality.

Graphics and Logos:

As a starting point, graphics and logos are to be submitted in Illustrator-EPS format (file name.eps) or -AI (file name.ai). Alternatively, material can be submitted in PDF format (file name.pdf), TIFF format (file name.tif) or J-PEG format (file name.jpg).

Logos from the internet are usually not of print quality.

Using web and email addresses in advertisements:

It is possible to have clickable web and email addresses in the ads in the digital issues of EL+ENERGI.

How to do it:

- Web and email addresses must be text only
- Space must be added between web and email addresses and other text

- Email addresses are to be written in full and include @

- Web addresses are to be written in full and include www.

TechMedia A/S cannot be held responsible for web-links not working correctly.

Contact:

We value good customer communications and are willing to mentor and offer advice within our areas of expertise. Should we on receipt of advertisement material have any doubts or questions regarding the material or quality, we always contact the customer.

For questions regarding advertising material in EL+ENERGI, please contact Marianne Dieckmann, tel: +45 43 24 26 82 or via e-mail: md@techmedia.dk

General Information

Editorial objective:

To inform technicians, engineers and scientists about technology, laws and standards, companies and new products from all branches of the electric-, energy- and installation industries through the annual editorial plan of the relevant topics.

10 reasons for choosing EL+ENERGI:

- 1** EL+ENERGI is the most important news-source within the electrical engineering-, energy- and installation community about the current news of interest to the business.
- 2** EL+ENERGI is written for - and read by - technicians, energy experts as well as scientist and design companies from all parts of the electricity-, energy-, industrial- and automation sectors
- 3** EL+ENERGI describes in a language easy-to-understand the new technologies, products as well as relevant laws and regulations from the authorities.
- 4** Each edition of EL+ENERGI runs a current topic that gives the reader the latest knowledge from the topic in question. The theme plan is dynamic and changes with the market needs and trends.
- 5** EL+ENERGI frequently publishes articles on energy production, -transfer and -storage, power-to-X, lighting, automation, HVAC, safety/security and power electronics with descriptions of the new standards, technologies, products and their applications.
- 6** In each edition articles on the practical execution of all types of installations can be found in EL+ENERGI as well as news about components, systems, clothing, tools, instruments and work vehicles.
- 7** EL+ENERGI is fully independent, and commercial interests cannot influence the editorial content. This ensures an objective coverage of all subject relevant to the publication.
- 8** EL+ENERGI participates in national and international exhibitions and conferences and brings detailed coverage both before and after the events.
- 9** EL+ENERGI is published by TechMedia A/S, which is one of the largest technical publishing houses in the Nordic region.
- 10** EL+ENERGI attracts both smaller and larger advertisers who thereby reach a well defined and targeted group through the magazine.

Readership profile:

- **42% - 1965**
Electricians and Engineering Contractors
- **30% - 1404**
Electro Engineers and Engineering Consultants
- **21% - 982**
High Power Supply industry, manufacturers, trading companies and electricity wholesalers
- **3% - 140**
Machine, automation and robot industry
- **2% - 94**
Public authorities within state, municipalities and regions. Research and educational institutions. Defense
- **2% - 94**
